

UNIVERSITÀ DEL PIEMONTE ORIENTALE

THE NOVARA CAMPUS LIBRARY

«Rita Fossaceca»

An overview

**HOW TO REACH
THE CAMPUS
FROM DSF**

Where we are

Novara, 18 Ettore Perrone street, inside the University Campus

Daily opening hours

Monday to Friday, 9.00 a.m to 6.00 p.m

READING ROOMS

more than 100 seats in the reading rooms

**smart area with sofa/work station
(by reservation)**

The library's collections

The library's holdings cover two main areas:

- **economics and law**
- **medicine, pharmacology, and allied sciences**

Our shelves hold about 25,000 books concerning both areas, most of them available for loan.

Digital library

The University Library System allows all UPO's students to access collections of **electronic journals, ebooks, and databases** from leading international academic publishers, with whom it has subscription agreements.

Within the university, you can access the digital library by connecting to the university network, by using your **university e-mail address** and your personal email password

eg. 12345678@studenti.uniupo.it + personal password

Off-campus access to the digital library: via VPN <https://ref.uniupo.it/secure/>

Main STM digital resources

- Databases
- e-book platforms
- e-journal platforms

The LIBRARY SERVICES

- **Access and consultation:** Users can freely access the library, consult books on the shelves, access digital collections via computer stations, or their own devices, or study on their own materials in the reading rooms
- **book loan:** you can borrow up to three books at a time, with the possibility of extending the loan period by 15 days
- **digital lending** (loan period and quantity depending on the publisher platform)
- **document supply** This service allows you to receive scientific articles published in journals not held by the library, free of charge
- **copying and printing**
- **enquiry and information service**
- **books transport shuttle from Library and DSF**, twice a week, Monday and Thursday, upon reservation

Accessibility

The Campus library is **accessible, inclusive and innovative**, also for users with cognitive and sensory impairments, thanks to a project funded by the European Union and the Ministero della Cultura.

The library provides **assistive technology kits** to support users with disabilities and ensure them inclusive access to information and services: screen readers, screen magnifiers, text readers (which scan printed text and reproduce it vocally via speech synthesis), scanner pens and reading pens, as well as other digital tools designed to assist users with special educational needs.

New service: supplying textbooks in accessible format for students with visual disabilities or physical-motor disabilities that make it difficult or impossible to use and read printed texts. If you need this service, please contact the library.

Online catalogues

BiblioUpo is the online catalogue of the UPO libraries.

From BiblioUpo you can:

- **to search the UPO libraries' bibliographic holdings**
- **check** if the book you are looking for is available, already on loan and when it will be available again
- be updated on news from the University Library System

MyBiblio, your personal area: enter by your university email and password.

From **MyBiblio** you can:

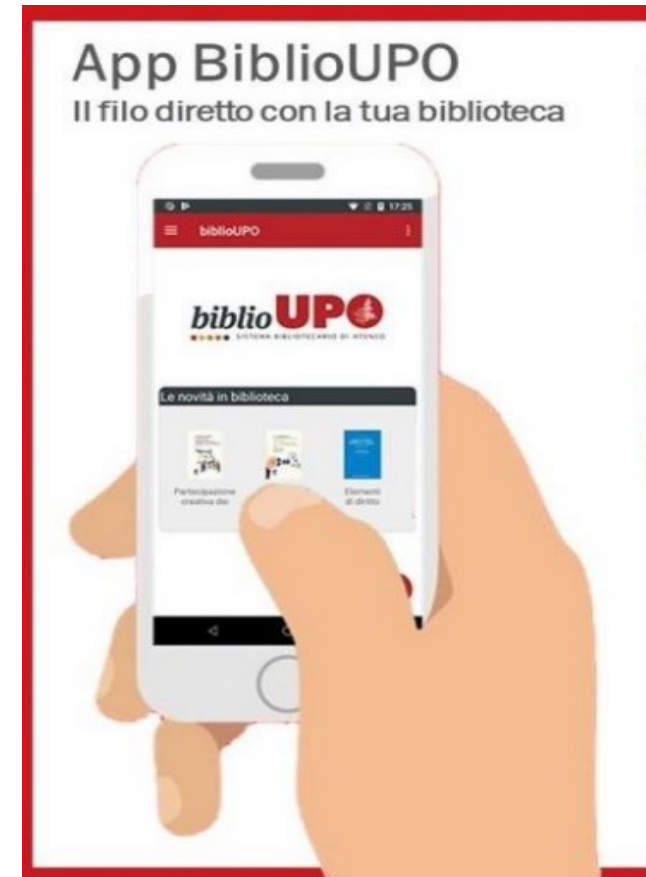

- **look for the books you need**
- **borrow a book**
- book the smart areas in the reading rooms
- book the **book shuttle service**

BiblioUpo is **accessible for users** with cognitive and sensory impairments. The **accessibility settings** can be adjusted by clicking on the selected disability profile.

App *biblioUPO*

Download the **BiblioUpo App** (available from Android and IOS stores, for free) to navigate the online catalogue and access the library services directly from your mobile phone!

 **Comparing *Tretinoin* to Other Topical Therapies in the Treatment of *Skin* Photoaging: A Systematic Review.**

Di: Siddiqui, Zoya; Zufall, Alina; Nash, Marissa; + altri 3 • In: American journal of clinical dermatology, 2024 Nov, volume 25, numero 6, pagine 873-890 (18p) • MEDLINE

Many morphological and histological changes take place in *aging skin*. Topical *tretinoin* is the gold standard anti-*aging* agent used to reduce signs of *aging* through stimulation of epidermal growth and differentiation and inhibition of collagenase.
